Accessing and Correcting Your Information

You can review and change your personal information and certain other information about or relating to you by logging into our Services and visiting your account profile page.

Data Security

We have implemented measures designed to secure your personal information from accidental loss and from unauthorized access, use, alteration, and disclosure. All information you provide to us is stored on our secure servers behind firewalls. Any payment transactions, account authentication and credentialing, and personal information you enter related to your account will be encrypted using SSL technology.

The safety and security of your information also depends on you. Where we have given you (or where you have chosen) a password for access to certain parts of our Services, you are responsible for keeping this password confidential. We ask you not to share your password with anyone.

Unfortunately, the transmission of information via the internet is not completely secure. Although we do our best to protect your personal information, we cannot guarantee the security of your personal information transmitted to our Services. Any transmission of personal information is at your own risk. We are not responsible for circumvention of any privacy settings or security measures contained on our Services.

Privacy & The Blockchain:

A key feature of many blockchain technologies is the transparency and public accessibility of on-chain transactions. This includes, without limitation, your public account address (“**public key**”) and certain associated information. Some of our Services allow users to send crypto-assets from our Services to their own public keys, which we may collect to conduct such transactions. Information stored on-chain (including without limitation that generated when using the Services) may be public, immutable, and, in many cases, cannot be deleted or amended. Your public addresses may reveal information about you and this information can potentially be correlated now or in the future by any party who chooses to do so, including law enforcement. If you are unfamiliar with blockchain technology and its transparent and public nature, we strongly encourage you to study how information is stored on blockchain technology before electing to use our Services that interact with public blockchains.

Changes to Our Privacy Policy

It is our policy to post any changes we make to our privacy policy on this page with a notice that the privacy policy has been updated on applicable interfaces or pages of our Services. If we make material changes to how we treat our users’ personal information, we will notify you by email to the primary email address specified in your account. The date the privacy policy was last revised is identified at the top of the page. You are responsible for ensuring we have an up-to-date active and deliverable email address and contact information for you, and for periodically visiting our Services and this privacy policy to check for any changes.
